

DRY MOUTH

Have you ever had dry mouth?

Dry mouth (xerostomia) can be caused by medications, disease, chemotherapy, smoking, drug use, and even stress. Dry mouth can lead to severe tooth decay, sensitivity and oral discomfort. MI Paste™ restores calcium and phosphate that fights against the risk of tooth decay.

MI Paste™ / MI Paste Plus™

- Relieves dry mouth by restoring that “normal feeling” of saliva lubrication
- Helps restore healthy components of saliva, such as calcium and phosphate, that help safeguard the oral environment against the risk of tooth decay
- Helps soothe and remove tooth sensitivity

Additional Recommendations:

MI Paste Plus™ contains 900ppm fluoride (almost same amount as regular fluoride toothpaste). MI Paste™ does **not** contain fluoride.

MI Paste™
MI Paste Plus™
SKU #690506

Saliva is your body's natural oral defense system, delivering important minerals to your teeth to keep them strong and healthy. Without enough saliva, you can suffer a mineral imbalance that leads to increased risk of tooth disease. MI Paste™ / MI Paste Plus™ relieves dry mouth and helps strengthen enamel.

Easy At-Home Application

MI Paste Plus™ is recommended for patients age six and older.

Use regular MI Paste™ for patients under the age of six and for expectant mothers.

Squeeze a small amount onto finger.

Apply to teeth using finger to spread over all tooth surfaces.

Leave for at least 3-5 minutes. Expectorate (spit) but do not rinse. Leave the excess to slowly dissolve.
