

SENSITIVITY

Are your teeth sensitive to hot or cold?

Tooth sensitivity has many causes including:

- Exposed roots
- Tooth whitening
- Abraded or eroded teeth
- Cavities and cracked teeth

Your dentist and dental hygienist can advise you on the cause. Cavities and cracked teeth require other treatment.

MI Paste™ / MI Paste Plus™

- Helps soothe sensitivity
- Forms a buffer against plaque
- Helps restore calcium and phosphate in your teeth
- Helps strengthen tooth enamel

Additional Recommendations:

MI Paste Plus™ contains 900ppm fluoride (almost same amount as regular fluoride toothpaste). MI Paste™ does **not** contain fluoride.

MI Paste™
MI Paste Plus™

SKU #690501

MI Paste™ / MI Paste Plus™ can be used on surfaces that are sensitive to cold air, as well as hot/cold, sweet/sour foods and drinks.

Easy At-Home Application

MI Paste Plus™ is recommended for patients age six and older.

Use regular MI Paste™ for patients under the age of six and for expectant mothers.

Squeeze a small amount onto finger.

Apply to teeth using finger to spread over all tooth surfaces.

Leave for at least 3-5 minutes. Expectorate (spit) but do not rinse. Leave the excess to slowly dissolve.

How Often

Daily as needed.

When

In the morning and the evening after brushing and flossing.

How Long

On-going, as needed.

How

Finger application or custom tray application.

Other

Brush with an extra-soft toothbrush to help prevent abrasion on the tooth and root surface. Avoid acidic drinks and foods. Use a regular fluoride toothpaste twice daily if recommended by your dental professional.
